

$\mathcal{G}'$:

Geometric representation

$\equiv$

$$\mathcal{G}' = \{\mathcal{N}, \mathcal{A}\}$$

$$\mathcal{N} = \{n_1, n_2, n_3, n_4\}$$

$$\mathcal{A} = \{(n_1, n_2), (n_1, n_3), (n_3, n_2), (n_4, n_3)\}$$

Set-theoretic representation
($\mathcal{N}$ = set of nodes, $\mathcal{A}$ = set of arcs)

$\equiv$

$\mathcal{G}'$	n_1	n_2	n_3	n_4
n_1	0	1	1	0
n_2	0	0	0	0
n_3	0	1	0	0
n_4	0	0	1	0

Adjacency matrix
