

Geometric representation

$$\equiv$$

$$\begin{aligned} \mathcal{G} &= \{\mathcal{N}, \mathcal{A}\} \\ \mathcal{N} &= \{n_1, n_2, n_3, n_4\} \\ \mathcal{A} &= \{\{n_1, n_2\}, \{n_1, n_3\}, \{n_2, n_3\}, \{n_3, n_4\}\} \end{aligned}$$

Set-theoretic representation
 $(\mathcal{N} = \text{set of nodes}, \mathcal{A} = \text{set of arcs})$

$$\equiv$$

$\mathcal{G}$	n_1	n_2	n_3	n_4
n_1	0	1	1	0
n_2	1	0	1	0
n_3	1	1	0	1
n_4	0	0	1	0

Adjacency matrix
